Rhino Race

a game for 2 players **Need: Counters, Dice**

Each player chooses a mini game board for the game and places a counter on the Start. Place 13 counters beside the game board. Each player rolls a dice and moves forward that many spaces. Compare the numbers that the players land on and the player with the largest value takes a counter. If a player lands on the zoo, they take a counter from the other player. Continue moving around the board and comparing numbers. When all 13 counters are gone, the winner is the player with the most counters.
